You will receive at least... 		<b>55 Pounds of Beef!</b>	<b>115 Pounds of Beef!</b>	<b>230 Pounds of Beef!</b>

"1/2 Steer" bundles are made with an actual full Half of a steer, fabricated to our expert butchers "standard" recommendations as listed. If you customize your Half Steer, please be aware that the thickness and sizes you request will change the final quantities and will make them differ from our "standard" pars as listed above.

"1/8" & "1/4 Steer" bundles are pre-made kits. These are assembled according to the spec sheet quantities listed above. Some items on a steer are impossible to split into two or four even sections, so there are some "extra" items included in these kits, or some removed entirely for balance. Our carefully designed spec list provides you with maximum options and "bang for the buck". Think of these kits as a "sampler" before buying a Half!

For example, we include a Tri-Tip in all kits, however one Half of beef actually only produces ONE Tri-Tip. Instead of cutting (& ruining) the Tri-Tip into 4 even pieces, we include it whole with all kits. Alternatively, there is only one Picanha on a half of a beef, but this item is ONLY included when purchasing a Half Steer, etc.

Steaks are cut to standard sizes of 8 to 12 ounces. Roasts vary from 2 to 4 pounds.

**1/4 Steer Kits are definitely our most popular option!!!**
